

HOT NOODLE POSITIVE WORKPLACE BEHAVIOURS WEBAPP SOLUTION BY EMMA PAWSON

HOT NOODLE POSITIVE WORKPLACE BEHAVIOURS WEBAPP SOLUTION BY EMMA PAWSON

WHY I CHOSE THIS SOLUTION...

I chose to create a webapp solution using Elucidat cloud-based authoring tool. Firstly, this was my chosen tool due to its flexible and innovative visual capabilities. Secondly, I chose a single scroll microlearning solution to replicate the learners everyday web experience.

WHY I RECOMMEND THIS APPROACH...

I put the learner at the forefront of my decision-making process. The recommended approach appeals to this audience due to its:

- Web-like look and feel
- Mobile first design (with desktop capabilities)
- The single scrolling page style means learners can easily access just in time learning
- Microlearning covering essential information appealing to the time poor
- Leadership endorsement used as the 'hook'
- Interactive and learner led design
- Gamification elements threaded throughout for increased engagement.

HOW IT MEETS COMPLIANCE NEEDS...

Content created on the Elucidat platform can be published to web and/or SCORM, therefore, is compatible with being marked complete on an LMS. The Hot Noodle team can also include learner input interactions to collect additional data such as self-rated confidence.
